NEW FEATURE ON HYBRID PD SATELLITE

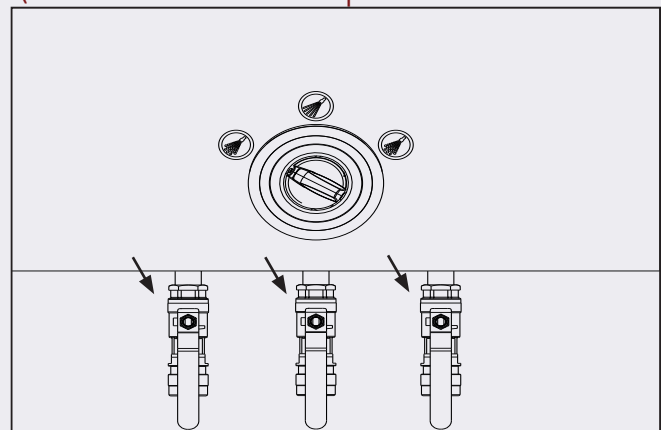

Nilfisk Food is introducing a new feature on the Hybrid Pre Diluted Satellites with local block (SU21PD1 & SU21PD2)

On the Hybrid Pre Diluted Satellites, we have added a feature which turns on/off the air supply for the pre-diluted outlets. This feature means, that turning on/off air supply for the pre-diluted outlets is done by turning the handle on the front of the unit to either foam or to disinfection.

(Air turned ON to the pre-diluted outlets-FOAM)

(Air turned OFF to the pre-diluted outlets-DES)

The Hybrid Pre-Diluted Satellites without local block (SUPD1 & SUPD2) already has this feature so now they all share the same technology and features.

Should you need any further information do not hesitate to contact our company.
