

Washing brush

Ecolab washing brush is a water fed brush for professional cleaning of floors, walls and cold counters in Institutional kitchens and in fresh food departments in Food Retail Stores.

In the water fed brush, a mixture of water and product comes out from each filament bundle and via a nozzle, ensuring constant flow of water to the working areas. The water supply is controlled via spraying gun, that can be simply shut down.

The 1.5 m handle with ergonomic hand grip and standard Nilfisk FOOD stainless steel male coupling, fits to the spray gun on our tap water cleaning stations and it can be mounted and dismantled within seconds.

Technical specifications

Brush	
Dimensions (mm)	300 x 60
Construction	Polyester PBT 0.50
Handle	
Dimensions (mm)	1500 x 32, 1/2" with Nilfisk FOOD SS connector
Construction	Aluminium

Applications

- Floors and walls in Institutional kitchens
- Floors, walls and cold counters in fresh food departments in Retail Stores
